

Industrial Coalescer Cartridges

Description

Facet industrial coalescer cartridges provide efficient and economical filtration and coalescence of fluids in a wide range of applications where El certification is not required. This broad range of liquid/liquid coalescers provides greater coalescing efficiency and contaminant holding capacity than most conventional coalescers or other separation techniques. As a result, Facet industrial coalescers improve product quality, reduce maintenance costs and help prevent unscheduled shutdowns.

Facet industrial coalescer cartridges are manufactured using proprietary combinations of high performance filter media. Years of research and development in phase separation technology has enabled Facet to develop a very broad range of filter grades to meet the stringent requirements of industrial applications.

Facet industrial coalescer cartridges are available in numerous configurations to replace most conventional coalescing cartridges. In addition, Facet can develop special configurations to meet specific applications requirements.

Benefits

- High Performance filter media provides effective particle removal and coalescence in a wide range of applications
- Proprietary design provides superior performance when compared to conventional coalescing cartridges
- Continuous lengths minimize process downtime, reduce cartridge change-out costs and eliminate filter bypass concerns
- Retention ratings available from 1 to 25 microns
- 90-95% nominal efficiency solids removal ratings. Water removal efficiency is by series
- Coated components are available as standard options
- 75 psid burst strength permits use in demanding applications

Applications

- · Chemicals, Resins, and Solvents
- Hydraulic Oils
- Hydrocarbons
- · Petroleum Refining
- Pipelines and Petroleum Terminals
- Power Generation
- Pulp and Paper Industry
- Transformer Oils
- Turbine Oils

MATERIALS

Filter media options:

2 - 25 µm: CR, CB, CC Series: Combination of

Fiberglass and Cellulose Medias with

Outer Sock

Gasket Materials:

Standard: Buna-N

Optional: Vegetable Fiber, Neoprene, Viton®,

Non-asbestos Replacement

Metal Components:

Standard: Powder Coated Epoxy Components

Adhesives: Thermoset PVC

Urethane (optional) Epoxy (optional)

Notes

1. The dimensions are nominal. There are many other sizes and combinations, not listed here, that are available. Please call us for assistance with special sizes and deliveries.

2. Water removal ratings are based on kerosene type fuel, S.G.O.78 and viscosity of 33 SSU at 70°F and recommended flow rates. Removal efficiencies will vary with S.G. viscosity, temperature, and flow rate. Please call us for exact sizing and removal ratings
